Business Report

1. 2015 Operation Outcome Report

The overall revenue throughout 2015 of the company was NTD 2,780,173 thousand, an increase of NTD 202,137 thousand (7.8%) from 2,578,036 thousand in 2014. The consolidated revenue throughout 2015 was NTD 15,479,543 thousand, an increase of NTD 647,697 thousand (4.4%) from 14,831,846 thousand in 2014. Profits throughout 2015 totaled NTD 1,112,850 thousand, an increase of NTD 164,216 thousand (17.3%) from 948,634 thousand in 2014. Both the revenue and profits set historical records in 2015, continuing the growth momentum of respective affiliated businesses in 2014 from 2013. With every employee within the group working hard in 2015, most businesses accomplished growths from 2014. Taiwan's Oil & Fat, Frozen Dough, Frozen Noodle, Namchow Thailand, in particular, showed relatively high growths. Our company has always been known for its quality, safe, and healthy products. We have an internal food safety committee consisting of experts with exclusive responsibilities to carefully control, monitor, and effectively manage the source of raw materials supplied. We physically visit the facilities of our overseas suppliers and pursue the highest testing criteria. Our efforts have gained confidence and support from consumers. All businesses have continued to perform and grow well.

Financially, the company's debts totaled NTD 5,578,132 thousand in 2015; the debt ratio was 50.4%, an increase of 0.6% and NTD 531,492 thousand from 49.8% in 2014 when the overall debts were 5,046,640 thousand. In terms of the consolidated statement, the company's debts totaled NTD 12,755,258 thousand in 2015; the debt ratio was 69.3%, an increase of 0.4% and NTD 1,093,522 thousand from 68.9% in 2014 when the overall debts were 11,661,736 thousand. Cash inflow as a result of business activities totaled NTD 2,710,224 thousand; the current ratio was 136.7%, which was comparable to 137.5% in 2014, indicating that the overall financial outlook was relatively desirable.

As far as research and development is concerned, crystal detergent soaps and grapefruit seed antiseptic products have been recognized by consumers and the public since a long time ago because they are made with natural fats and feature no additives. The fat and oil business continues to research and develop healthy and special-purpose oils such as oil for making pineapple cakes and that for deep-fry purpose in the food and beverage industry.

Meanwhile, two types of premium fresh cream are introduced from Japan to suit the needs for making various salty or sweet pastries. When used in combination with Namchow's butter, they give rise to all kinds of cakes. The frozen dough business continues to focus on researching and developing novel options to attract consumers and can tailor-make products for customers; it is a long-term trustworthy partner in the baking industry. The ice cream business introduces new products each year, which are always well accepted by consumers. To meet the needs of respective customers, different flavors of soft-serve ice cream are introduced to the market on a quarterly basis. The ambient-temperature rice business produces ready-to-serve cooked fiber-rich rice with a health-preserving appeal; it is claimed to be able to regulate blood sugar and lipid and the first healthy rice certified with health claims in the country. In February this year, it was selected by the Council of Agriculture under the Executive Yuan to be a proactively developed seed player in an effort to reinforce distribution of domestic agricultural products around the world; it is indeed an elite processed food with exportation potential.

2. Summary of 2016 Business Plan

The fat and oil business adopts a consultation-based marketing strategy that has significantly helped grow the revenue for the past six years. In response to the increase in sales, the third production line for oils and fats newly built at the Guangzhou facility was commissioned in June two years ago and the ground was broken for the construction of the Jinshan Plant in Shanghai on March 9 last year; the investment is expected to total around NTD 2.1 billion. For Stage 1, production of oils and fats and frozen noodles will be commissioned in October this year and the production lines for frozen dough and fresh cream will be expanded for Stage 2.

Namchow insists quality for its oil and fat products. Thanks to the replacement of orders on the market, the sales climbed significantly. Expansion of the fat and oil refining equipment with an investment of NTD 60 million at the Taoyuan facility was completed at the end of last year, contributing to an increase in the throughput of around 30%. In terms of the catering business, Dian Shui Lo restaurants use mostly local food ingredients that are carefully prepared to win the hearts of consumers of different generations and are widely accepted and spoken well of. A new store was opened at Big City in Hsinchu two years ago. This year, the seventh Dian Shui Lo restaurant and Duroyal Cafe opened at Mitsui Outlet Park this year. The business has been doing well with outstanding sales since they were

opened.

Namchow has invested in Thailand for 25 years. Exportation has grown quickly since 2010 and the throughput utilization rate has reached the high level. For the next two to three years, it is expected that NTD 500 million will be invested to constantly advance the production efficacy. Attempts such as baby rice cookies, cooked rice, and cooked porridge for the past few years have continued to bring about favorable results. The Southeast Asian market has a promising future. Namchow Thailand is the springboard for the group to take part in ASEAN markets.

To meet regulatory requirements and the high corporate standards, additional NTD 37 million will be invested in the main food safety laboratory to be set up at the Taoyuan Plan. The laboratory will be devoted to autonomous tests and autonomous management. The Guangzhou Plant was certified as a high-tech enterprise for its agricultural products fine processing technology and green process last year and also designated as an "Guangdong Province Baking Oil and Fat Engineering Technical Research Center enterprise" by the Guangdong Provincial Department of Science and Technology in December. The Jinshan Plant in Shanghai received subsidies totaling RMB 18.76 million for industrial transformation and upgrade from Shanghai City Government for its energy-saving, carbon-reduction, and food safety-related investments at the end of last year. All of the said accomplishments are possible because of the endless effort of Namchow in food safety and the reinforced investment in environmental protection. Since it was first established in 1952, 64 years have passed. What remains unchanged is the integrity and emphasis on the rights of consumers and the pursuit of being number one in respective business fields. Namchow serves as the best example by consolidating corporate social responsibilities in its management.

Under the effort, belief, and determination of all staff, I believe that we will continue to reach new heights in business performance and create even greater investment benefits. Please continue to support and encourage us to the best extent possible.
